

Barden is global leader in the design and manufacture of super precision deep groove and angular contact ball bearings, made to exacting Abec 7 and Abec 9 standards, and a valued partner to Miraj Corporation. Miraj proudly distributes the Barden line of super precision bearings that are known for their accuracy, long service life, quiet operation and unsurpassed reliability.

Barden offers a variety of bearing race materials, such as AISI 440C, SAE 52100 chrome steel, M50 tool steel, cage types such as high temperature options made from synthetics, steel and bronze, high speed options like phenolics & stainless steels, along with a large variety of seal and shield options. Barden bearings are often used in the most demanding applications where lesser bearings have been known to fail.

Contact Miraj Corporation for all of your Barden ball bearing needs.
